Share Your Story

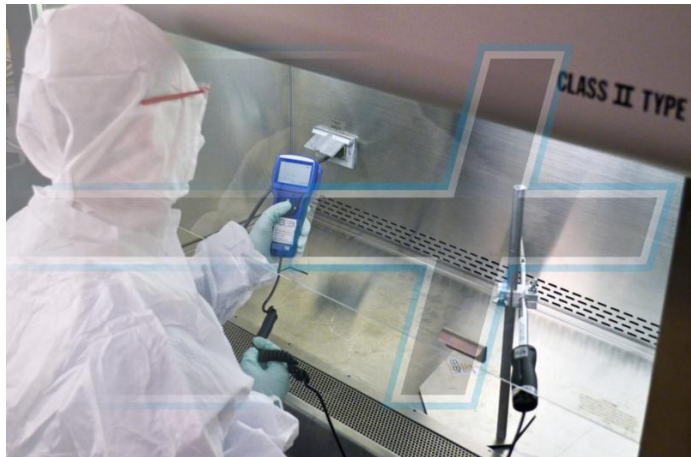

Tell us about a time when SBB Testing and Certification went above and beyond for you. (For example, the time we changed HEPA filters in an operating room on the third shift in order for surgeries to go on as scheduled, or when we provided a facility assessment and removed half the HEPA filters in order to make the room cleaner and more efficient.) The story with the most "likes" or "shares" will get a \$50 gift card.

What's In The PLUS?

SBB Testing and Certification is more than a testing and certification company, we're a *service and solutions* company. On top of our outstanding customer service we're always there to help you learn more about your cleanroom facility. Let SBB Testing and Certification show you what the PLUS means by helping you find a solution.

SBB Testing and Certification Plus won't fail your cleanrooms or equipment and walk away without a recommendation and/or a corrective action plan. The Plus in SBB is years of experience understanding the environmental impact on products and what can cause these invisible changes.

What Sets Us Apart:

- The best customer service. We pride ourselves on building a strong customer/client relationship and always try to work within the customers' schedule as opposed to the customer working within ours.
- Replacement filters and BSC parts in stock.
- As part of the larger SBB family, SBB Testing and Certification works with advanced engineering and manufacturing groups and has access to quickly and efficiently bring those services to your project.
- For more of "what sets us apart" visit our [website](#).
