

## Welcome to the new SBB Testing Plus Newsletter

Within these newsletters we will keep you up-to-date on recent and upcoming SBB Testing & Certification news, offers, services and industry developments. When you choose SBB, you should feel confident

knowing that you are getting the best service in the industry. SBB Testing provides NSF/ANSI 49 accredited staff, fully supported by audited quality systems.

In this inaugural letter we're proud to announce that we have two newly accredited NSF/ANSI 49 technicians. SBB Testing's technician training program leads the industry with a 100% passing rate on the first attempt.

If you are serious about your cleanrooms, BSC's and HEPA filter device performance and certifications; SBB Testing is your preferred choice. SBB Testing is fully committed to providing each client a total quality experience. We specialize in a unique depth of service for every one of our clients.

SBB Testing offers the full gamut of HEPA filter, Cleanroom, BSC, LFH and specialty device testing, servicing and certification. Our service is unmatched, immediate and completely objective. We have serviced and certified many different types of equipment across various industries and have the experience and tools to fit your needs.

If you are a client serious about your testing and certification needs please contact us for availability and be sure to check below to see all our services.

Please take the time to check out our [new website](#) and be sure to check us out on [Facebook](#) and [Linkedin](#)!

**Thank You from the SBB Testing Team!**

▲ Comprehensive Cleanroom Testing, Balancing and Certification Services

- Cleanrooms ISO Class 1-9
- Laminar Flow Hoods
- Hood Decontamination
- Biological Safety Cabinets
- BSL 1, 2, 3
- Fume Hoods
- Professional Reporting
- Depyrogenation Ovens
- HEPA Filter Replacement
- Airflow Surveys
- Motors/Blowers Replacement
- Emergency Service
- Quality Assurance

▲ Cleanroom Testing and Certification

HEPA Integrity, ISO and EU Particle Counts, Air Change Rates, Viable Environmental Sampling, Room Pressure Testing and certifications and Room Recovery Testing and certifications. As built, at rest, and operational. Pre and post construction certification.

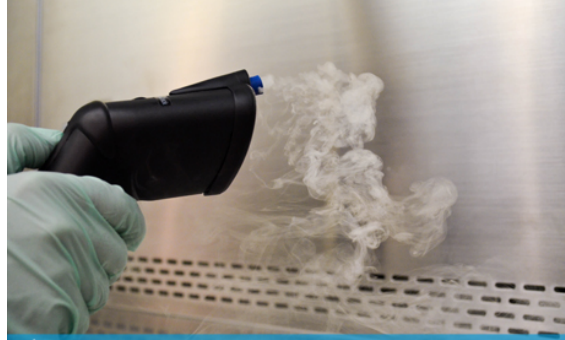

▲ BSC and Equipment Certification

NSF, CETA, ASHRAE and IEST certifications for BSCs, Fumehoods, Laminar Flow Benches, Animal equipment and any equipment needing flow or HEPA filter certification. BSL 1, 2, 3
