

New Service Announcement!

SBB Testing & Certification PLUS is proud to announce that we now offer VHP decontamination as another option for your BSC's.

New for 2017 SBB Testing & Certification PLUS has purchased and trained on VHP decontamination technology. In fact, we've already started using it in the field!

To better serve our clients, we are also maintaining our paraformaldehyde decon capabilities, which means we will be offering both decon methods from this point on.

Questions?

If your facility is interested in using or learning more about VHP decons please contact us for more information.
